

## YOGAMARG

### MISCELLANEOUS INFORMATION

Yogamarg is a website trying to help solve the issue of obesity in India by a traditional method of exercise, i.e yoga. We are a small team of four people who do development, research and documentation. This project was made using free-of-cost tools and with zero-funding. We are not seeking any donations/funding for our project and hope to continue running it as a service for the people. We have only used information available publically and only used public studies. We do not plan to conduct any studies ourselves, this means that all the content on our website is *allowed to be used everywhere* and for anything. At the time of writing our documentation (17th April 2025), our team consists of 4 members who request to be anonymous. We have 3 main roles-

1. Member #1- Lead Developer
2. Member #2- Secondary Developer
3. Member #3 & #4- Data Compilers

*PS: We're just a small team trying to make our country a better, healthier place. Thank you so much for using our service. ❤️*
